

WE ACCEPT

	plastic buoys		plastic crates
	polypropylene polyethylene - rigid plastic		plastic drums
	plastic bottles and caps		floating pontoons
	plastic food containers		whelk pots (nets and weights removed)
	plastic toys		net bins
			loose rope (bagged separately and free from contamination)
			gill nets (bagged separately from ropes)
			net trimmings / fisherman's kisses (if bagged separately)
			trawl nets (if stripped of metal and rubber and bagged separately or in a bundle)

NOT ACCEPTED

	rubber		polystyrene
	general rubbish		heavily contaminated materials
	sanitary products, cotton buds		traps/pots
			containers with any contents or contamination inside/outside
			glass
			fiberglass
			metal
			lead-lined ropes

About the Marine Regeneration Scheme

Globally only 9% of plastic waste is recycled, 12% is incinerated, whilst the remaining 79% is either sent to landfill, stockpiled in developing countries or dumped on land or in the marine environment. This is not due to the lack of recyclability but a lack of recycling infrastructure and consumer demand. In 2016, Odyssey Innovation pioneered the UK's first marine litter recycling scheme to counteract this issue. By adopting a circular economy business model we add value to the recovered plastic by creating award-winning sustainable products and by doing so, change the way marine plastic is viewed, 'from waste to resource'. The MRS collaborates with numerous communities across the UK to recycle marine plastic, including plastic recovered via its Paddle For Plastic campaign.

About the Net Regeneration Scheme

Whilst the MRS scheme works to support communities in the recovery of marine plastic, the NRS offers preventative solutions and tools to facilitate behavioural change within the fishing industry. It does this by offering free recycling facilities for end-of-life fishing gear and marine plastic in a traceable and sustainable manner whilst being an excellent alternative to sending gear to landfill, incineration or to it being abandoned. By removing cost barriers the scheme also supports fishermen to collect lost fishing gear and marine plastic waste whilst out at sea further supporting sustainability within the fishing industry.
